INFV/NETV 379 Cloud Computing

Research Project

Cloud Computing Research Project

- The paper will be based on your research of a currently deployed (in-use) cloud computing solution.
 - Describe in detail the purpose, technology, advantages/disadvantages, and history of your chosen solution.
 - Your paper should use examples from texts, the web, or library resources with appropriate APA resource citations.
- A PowerPoint presentation of your research should be created along with embedded voice annotations.
 - Or Panopto or other audio/video annotated delivery of the presentation
- Paper and presentation should be uploaded to the D2L Assignments by 11:59 PM on Monday of week 7.

Research Project

- 5-10 pages, Times New Roman 12 point font, double spaced
- Focus on clear & concise points
- Scope & Example Organization
